Desire Encapsulated features a slate of more than fifteen artists working between painting, sculpture and installation to expand on the theme of desire—how it is perceived across different psychological spaces and artistic practices, and how it is "encapsulated" through different artistic practices across time, medium and space. The exhibition presents a group of artists' work that considers desire as part of the fundamental human experience, a shared experience and the driven power of humanity.

The artists participating include Andrew Sendor, Catalina Ouyang, Guimi You, Lior Modan, Bambou Gili, Miguel Angel Payano Jr., Joeun Kim Aatchim, Lita Albuquerque, Yuri Yuan, Sula Bermudez-Silverman, Yanyan Huang, Yifan Jiang, Yesiyu Zhao, Ruby Leyi Yang, Chris Oh, Hiba Schahbaz, and Claire Colette.
